Freddy Mark V

Leading the way in coolant recycling

The Mark V is one of the largest of our coolant recycling vacuums, ranging from 500 litres to 1,000 litres tank capacity.

It has a tilting filter tank, enabling quick and easy emptying of the 60 litre basket. Designed to vacuum out coolant from machine tool sumps, machine beds, drip trays, conveyors and even the shop floor with the dedicated floor tool and recycle it for re-use.

- The most widely used and well-established coolant vacuum range in the world
- Recycles coolant and extends coolant life
- Enhances coolant performance and production quality
- Significantly reduces coolant usage
- Improves and extends tool life
- Extensively cuts waste disposal costs
- Removes contaminants that cause bacterial growth
- Removes contaminants that cause micro-abrasions which can lead to dermatitis
- Complete with 24 months warranty

Specification

- 310 litres or 500 litres tank capacity *
- Finished in oil and acid resistant powder coated paint
- 60 litres perforated steel baskets
- Comes complete with full set of tools and hoses
- Filters available from 1- 1,000μm
 - * Custom option with 1,000 litres capacity is also available. Please enquire for more information.

* Custom option with 1,00 Freddy Mark V Models

4kW 415v	3	300	800	3800	250	120

Weight in kilograms (kg) * Water flow tested using a 51mm hose at the same level as the fluid being vacuumed.

If the machine is higher than the fluid, flow rates will be slower than the guited values.

Optional Freddy Service agreement

All of our Freddy coolant vacuums come with a 24 month warranty and optional 12 month service agreement, which includes:

- Two service visits per year inclusive of labour and travel
- Priority on call outs
- Reduced breakdown call out charge
